

## STEM activities

**Donna S. Puckett/Kindergarten  
S.S. Dixon Primary**

To the ACCEL grant committee:

I wanted to take this opportunity to thank you for this wonderful grant. The children had a chance for many STEM activities and learned to appreciate our earth. They also leave this unit of study with a sense of what they can do to help.

They are very eager to pick up litter, turn off lights, televisions, etc. and encourage their parents to recycle or reuse items in their home. Education is the first step towards conservation of our resources. Allowing me this grant, gave me the opportunity to educate these young children so that they can make a difference.

Many thanks,  
Donna S. Puckett  
S.S. Dixon Primary "K" teacher
