

Heather Stewart

Paxton High School

Grant Report

Thanks to your grant, I was able to purchase additional robots this year to improve our robotics program. These bots included both the Sphero Bolt and the mBot Ranger. Students used Spheros as an introduction to coding, and later moved on to more robust coding with the mBot Ranger with additional sensors available.

Thank you for your continued support of my students at Paxton High School! Over the years we have been able to participate in many STEM activities that would have never been possible for my students without your assistance. I truly appreciate your efforts.
