

Dixon Primary School

Pace, FL

2019-2020 School Year

Our students were enjoying the many coding activities that they were tasked with before the school year was cut short. We started with the basics, then progressed up to where they were coding the path and activities for their Ozobot. During our schoolwide Fairy Tale STEAM day, classes were tasked with coding the travel route between the three little pigs homes and to escape the big, bad wolf. Both students and parents alike really enjoyed this activity. We've incorporated math stations for distance, number sense, spatial sense, estimation, and problem solving. This is so cliché but it is the truth. When you see a child's eyes light up in "wonderment, excitement, and I get it", it truly makes this profession so worthwhile.
